

# Geomorphology Seminar - Spring 2010

## *“Fluvial Morphology and Sedimentology: Methods of Analysis and Environmental Interpretations”*

with

Dr. David S. Leigh, Geography Department

**Course and Call#: GEOG 8020, # 30-547**

3 Semester Credit Hours

Time and Place: *to be arranged (email [dleigh@uga.edu](mailto:dleigh@uga.edu))*

This seminar will examine alluvial channel forms and associated sedimentary environments. Emphasis will be placed on methods of analysis of modern and late Quaternary stream channels associated sedimentary deposits and interpretation of data. Occasional field excursions will be made to illustrate concepts. Each student will be required to prepare an independent research paper and present the results of the research to the seminar group toward the end of the semester.
